

SK50SRX SK58SRX

exhaust emission regulation

■ Bucket capacity: SK50SRX 0.14 m³ SK58SRX 0.16 m³

■ Engine power: 29.1 kW / 2,400 min⁻¹

■ Operating weight: SK50SRX 4,660-4,980 kg SK58SRX 5,080-5,440 kg

KOBELL

Complies with the EU Stage V We Save You Fuel

SK58SRX

Mini shovel SK50SRX/SK58SRX of KOBELCO has realised a completely new value by harmonising PERFORMANCE – greater efficiency and productivity with an increased power and speed and DESIGN – operator-based operability and comfort, refusing to accept any compromises. Its quality, which is undiminished by the mini excavator's size, is one of KOBELCO's answers to the question of the mini excavator's future.

KOBELCO continues its quest for innovation.

ROBELCO continues its quest for innovation.

UNFORGETTABLE COMFORT

Our pursuit of functional beauty and aesthetic sense produced a new interior design. KOBELCO

Air conditioner

Additional air vents provide a uniform air flow in front of and behind the operator and direct the air flow onto the window, improving the defroster's dehumidification function.

Switches with LED backlights

The switches and dials have LED backlights – they provide a bright, clear view in the dark and set a luxurious mood.

Smartphone holder/ USB/AUX port

FUNCTIONAL WORK ENVIRONMENT

Realisation of the operator's convenience and comfort.

A colour display with good readability comes as standard and shows various information such as operating history, maintenance cycle, and fuel and water temperature gauges. It can also be used to adjust the hydraulic oil flow to the attachments.

Energy Conservation Mode

The SK50SRX/SK58SRX adapts S-mode which enables 26% (SK58SRX only) less fuel consumption compared with H-mode.

Auto deceleration switch

Auto deceleration switch installed as standard. Easy-to-use switch control.

Hydraulic flow adjustment (Option)

Rotation or N&B piping flow can be selected from six preset types, or adjusted arbitrarily.

Maintenance information

Engine start password

A password is required when starting the engine for greater security. The initial password must be set at our workshop.

Operation history

Easy access

The shape of the access shutdown lever has been adapted and the door opens widely, offering excellent access.

Slide-open window

The window on the right side of the cab can be opened and closed both forwards and backwards to facilitate ventilation and make it easier to hear outside noise.

The operator can move the levers horizontally without twisting their wrist, which reduces the fatigue caused by the operations.

Proportional hand control lever for rotation & N&B piping (Option)

Precise proportional controls are integrated into the joystick for ease of operation.

DAB+ radio (FM/AM&AUX&Bluetooth® & hands-free telephone)

Coat hook

Speaker

Cup holder

12V power outlet

LED door light

EXPERIENCING A COMPETENT PERFORMANCE

The new hydraulic system

Compared to previous models, the new hydraulic system is significantly improved, which thereby shortens the digging cycle time remarkably. It attains high performances without reducing the speed even when a heavy load is applied or when travelling on a slope.

By replacing the travel motor and swivel joint, the travel speed is increased.

>>> Travel speed

Faster by 12% (SK58SRX)

Faster by 5% (SK50SRX)

(Compared to previous models with two speeds)

>>> Hill-climbing speed

Faster by 10% (SK58SRX)

(Compared to previous models)

By replacing the spool, the power loss is reduced, resulting in higher digging and swing speeds.

>>> Digging cycle time

Shortened by 11% (SK58SRX)

Shortened by 4% (SK50SRX)

(Compared to previous models)

COMPACT, YET, BIG PERFORMANCE

Min. swing radiusat boom swing (SK50SRX (Cab) / SK58SRX with standard arm)

1,850 mm *SK50SRX (Canopy) is 1,810 mm.

Short tail swing

The compact tail swing improves operating efficiency in limited space.

-Tail overhang:

190 mm (290 mm)

Figure in () shows the value of with additional counterweight.

5,970 mm (SK50SRX) 6,460 mm (SK58SRX)

Figures above show the value for cab with long arm spec.

Wide working range

A larger boom and arm are provided as standard equipment to ensure a wide working range.

VERSATILITY

Easy hydraulic piping for quick hitch (Option)

Various attachments, such as the bucket, can be easily mounted and dismounted without leaving the cab, increasing working speed.

Dozer lever

The shape and angle of the dozer lever have been improved to make it easier to grip, and the first and second speed switches have been moved to the dozer lever to improve manoeuvrability when dozing. With the front dozer specification, functions can be switched on and off conveniently.

Dozer-blade shape

KOBELCO's unique blade design solves this problem by forming the earth into an arc that always falls forward. Because this prevents earth from falling behind the blade, only "one pass" is needed.

Angle dozer (Option)

Floating dozer (Option)

A floating dozer is fitted as optional equipment, contributing to easy levelling work.

RELIABLE CONSTRUCTION

Bolt-tightened pins firmly lock the boom to prevent the boom top from opening laterally. Box construction dozer supports provide greater strength.

Large, thick cast-iron swing bracket/front bracket.

The hydraulic hosing is housed inside the swing bracket.

NON-STOP OPERATION BY INDr

The offset duct slows down exhaust from the muffler and engine cooling fan.

Ultimate low noise

KOBELCO's exclusive iNDr Cooling System delivers amazingly quiet operation.

Sound Power Level

iNDr+E

The iNDr+E system on the SK50SRX/SK58SRX features air intake at the front of the machine and air exhaust underneath. It functions in the same way as the iNDr system on the SR series machines, but also directs the muffler exhaust underneath.

The exhaust is further slowed down and cooled through the offset duct and then discharged into the atmosphere.

The iNDr filter has a high-density mesh of 30 lines per inch to collect dust.

EASY MAINTENANCE

Easy daily maintenance that saves the trouble of inspection and cleaning.

Easy Access to Component Inside the Cab

Hour meter

Air conditioner filter for outer air intake

Air conditioner filter for internal air circulation

Instruction manual storage box

Easy Access to Cooling Unit

iNDr filter

Laid out for easy access to radiator and cooling system.

Easy Access to Engine Compartment

Pre fuel filter with built-in water separator

The position of the pre fuel filter has been changed to make it more accessible.

- 2 Air cleaner
- **③** High-grade fuel filter

OPERATOR SAFETY

Reliable cab/canopy structure

The high-strength cab/canopy meets ROPS, TOPS and OPG Level 1 (Top guard) standards for greater operator safety.

LED work light Work light is mounted under the boom to protect from damage.

Safety valve for boom cylinder (Option)

Safety valve for arm cylinder (Option)

Good visibility

The wiper mount has been moved to the upper right of the cab support and the skylight opening has been enlarged, improving visibility to the front and above.

Rear view mirror (Option)

(Option)

Rear under mirror Hammer for emergency exit

Accumulator for emergency attachment lowering

An installed accumulator allows the attachment to be safely lowered to the ground using in-cab controls in the event of an unexpected engine shut-down and class leading smooth operation.

- 1. Do not attempt to lift or hold any load that is greater than these lift capacities at their specified lift point radius and heights. Weight of all accessories must be deducted from the above lift capacities.
- 2. Lift capacities are based on machine standing on level, firm, and uniform ground. User must make allowance for job conditions such as soft or uneven ground, out of level conditions, side loads, sudden stopping of loads, hazardous conditions, experience of personnel, etc.
- 3. Arm top defined as lift point.
- 4. The above lift capacities are in compliance with ISO 10567. They do not exceed 87% of hydraulic lift capacity or 75% of tipping load. Lift capacities marked with an asterisk(*) are limited by hydraulic capacity rather than tipping load.
- 5. Operator should be fully acquainted with the Operator's and Maintenance Instructions before operating this machine. Rules for safe operation of equipment should be adhered to at all times.
- $6. \ \ \, \text{Lift capacities apply to only machine as originally manufactured and normally equipped by KOBELCO CONSTRUCTION MACHINERY CO., LTD.}$

Note: This catalogue may contain attachments and optional equipment that are not available in your area. machines sold in your areas. Please consult your nearest KOBELCO distributor for those items you require. Specialist equipment is needed to use this machine in demolition work.
